WISE, HAPPY AND FEELING GOOD: MAXIMS ON LIFE, SUCCESS AND WELL-BEING

High Vibration Publishing. Paperback. Book Condition: New. Paperback. 234 pages. Dimensions: 8.0in. x 5.0in. x 0.7in. Your thoughts create your feelings, which create your attitude and vibration, which then define the quality of your life. Whether or not you're conscious of it, you are in charge of your life experience. You have total freedom to create well-being or distress. This should come as no surprise since modern medicine consistently confirms the harmful health impacts of thought-induced stress and depression. Thinking about something habitually can change your body chemistry and hypnotize you into believing that your perceptions are actually true. Negative thinking can prevent you from taking action, while positive, constructive and grateful thoughts can convince you to attempt and succeed at ventures that others who are equally capable might never dream possible. They also make you feel a whole lot better. Just how do you gain control of the awesome power of your mind in order to affect the change you want in your body, health and life? There's only one permanent fix. Change the way you think! When you think of your thoughts as food, you get a clear idea of their importance in your mental health and physical well-being. The thoughts you feed yourself may actually be more important than the food you eat. Your unconscious conditioning causes habitual thought patterns that create a vibratory frequency that radiates out from you to the world. Whether you are in a negative, neutral or positive frame of mind, your frequency is a reflection of that condition. The energy you emit has a tremendous influence on the circumstances and people that you encounter in your life. Since your personal view of reality is the result of a lifetime of thoughts, beliefs, emotions and feelings filtered through the lens of your particular conditioning,...
