Excerpt from The Practical Ditcher: A Treatise on Reclaiming Wet and Swampy Land, and Improving Moist and Wet Spots of Land Under Cultivation, by Open and Covered Ditches V. The Middle and Eastern States have then sands of acres of land which might be made to smile in its cultivators face, by comparatively little expense, which new are no more than fever and ages nests. Instead of moving to the far West, to undergo a change of climate, and expose ourselves to the different diseases consequent on such a change of location; would it not be better to drain these wastes, and turn them into profitable fields Here in the East, where we have a good market at our doors for all that we can produce, and always the highest prices, it is of immense importance to make proper use of every foot of land.
