### **Reviews**

*An incredibly great book with perfect and lucid answers. Better than never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).

Neuware - The Information Age is revolutionizing the way we communicate, acquire knowledge, and perform work. Society is shifting from occupations rooted in industrial production to those associated with knowledge and information, requiring the development of new skills for changing occupations and updating old educational methods. Educators need to be aware of economic and social changes and have a vision for how to design career education to respond to those changes. Individuals must also be prepared to learn on their own as careers evolve and change. The training necessary to adapt to the changing career culture needs to be made available to everyone, regardless of social class and background. In order to learn how to help students prepare for life, it is necessary to understand their views on careers. There is a critical and acute need to understand the perceptions of students from disadvantaged backgrounds, such as Upward Bound participants (identified by the U.S. Department of Education as part of the TRIO Program for low-income and first generation college students). 144 pp. Englisch.
