It may be necessary, however, to continue to apply fertilizer to the pond at short intervals. The collecting of entomostraca from reservoirs and lakes for the newly-hatched fish in the cement ponds is an important part of the work and occupies the time of many people. The peculiar bag-net required for this purpose is 25 to 30 feet long and 2.5 feet wide throughout its length, the bottom being cut off square and gathered with a string; it is made of fine cotton or calico that has been treated with extract of oak bark or other astringent solution. The bamboo pole to which the bag is attached is of about the same length. One man, standing on the bank, operates the net, drawing it slowly through the water and gradually accumulating a mass of water...
