paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 249 Publisher: Building Publishing (formerly Building Society) Pub. Date :2011-6-1. Zhihua edited by the water technology and engineering computation and simulation is the higher water supply and drainage engineering teaching Steering Committee recommended planning book. the book contains five chapters. the main contents include: basic knowledge of computer simulation. the application of mathematical methods used. hydraulics. pumps and pipe network systems. water quality engineering and reaction engineering. water supply and drainage system simulation. This book is not to calculate the basic knowledge of the technology point of scheduling systems. and professional case for the scheduling system. in addressing the problem of professional mastery. while computing the book covers the case of professional hydraulics. hydrology. hydrogeology. water pumps and pumping stations. water supply sewer systems. water treatment microbiology. chemical water analysis. water quality engineering and reaction engineering and many other courses. and strive to cover water supply and drainage engineering practice in the face of the typical engineering calculation and simulation problems. Water technology and engineering calculation and simulation. practical and professional. can be used as water supply and drainage engineering technology colleges and universities teaching books. but also can be used as reference books related to engineering and technical personnel. Contents: Chapter 1. the basics of computing and simulation calculation and simulation technology 1.1 Brief introduction of 1.2 computing platform used in this book the basic concepts and conventions 1.3 Variables 1.3.2 1.3.1 1.3.3 matrix functions and processes Chapter 2 Exercises the application of mathematical methods commonly used function interpolation and curve fitting 2.1 Case 2.1.1: find butterfly valve linear interpolation of the local drag coefficient 2.1.2 Case: least-squares method for the temperature dependence of oxygen saturation Case...
