Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Efficient Termination of Ada Tasks in a Multiprocessor Environment An efficient implementation of Ada task termination for shared memory MIMD architectures is presented. The solution is highly parallel and distributed; termination is not synchronized by a centralized supervisor, and there are no critical sections. The handling of block and subprogram termination that depend on nested tasks is also included. This implementation can be easily adapted to message based systems. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
